

SOLUTION

L&L Reinforce & L&L Seal

Foam-in-Place Technology.

A two-component room temperature cure epoxy structural adhesive or sealing material that allows for reduced labor and optimized efficiency due to its automated dispensing and robotic application ability.

KEY PRODUCT ATTRIBUTES:

- Does not contain isocyanates or volatiles
- Adhesion to a variety of substrates without surface preparation
- Maintains adhesion and protects substrates when exposed to environmental conditions
- Reduces labor and optimizes efficiency
- Accomplishes waste reduction
- Improved quality over hand applied method
